

YAMAHA V-MAX 1200

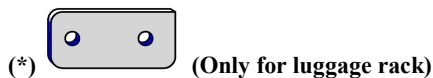

ASSEMBLY SISSYBAR/ LUGGAGE RACK

The SPAAN sissybar / luggage rack is made up of different elements that, combined with each other, allow the mounting of the backrest, sissybar with grill and luggage rack.

ASSEMBLY:

Anchor the two sides of the SPAAN support to the motorcycle. They are fixed to the front anchor of the original handle and to the bracket of the turn signals.

- **Sissybar.** Fix the arch of the backrest to the rear plates of the two support sides, with the four Allen screws **M6x20**.
- **Sissybar with luggage rack.** Fix the arch of the sissybar and the luggage rack to the rear plates of the two support sides, with the four Allen screws **M6x20**.
- **Placement of the pad:** Place the pad in front of the arch of the Sissybar, fixing it to the plate with the four **M5x10** Allen screws that are included in the kit. (On the back of the pad is marked with four holes in the fabric the position of the threads) .
- **Luggage rack.** Fix the luggage rack to the rear plates of the two support sides, with the four Allen screws **M6x20** interspersed between the plates of the support sides and the anchor plates of the luggage rack, the loose plates of the luggage kit.

Maximum load on the luggage rack: 4.5 Kg. (10 lb.)
