## HONDA REBEL 125/250

### Highway bar mounting instructions

-**Upper part:** The two welded plates in the center of the highway bar in its upper part, must be placed embracing the tube of the frame and it must be fixed with the **M6x60** screw included in the kit (**Image 1**).

- **Lower part:** It is anchored in the lower part of the frame tube, in the part that is divided into a double tube. The plates of the highway bar must be placed by the inside part of the tubes and fixed from the outside with the two forks included in the kit (**Image 2**).
