## KAWASAKI VULCAN S

### SISSYBAR / LUGGAGE RACKS MOUNTING INSTRUCTIONS

#### (1) Sideplates

- [Image 1] Remove the center cap of the side supports of the rear fender. It is fixed with two screws. (Allen key 4).
- [Image 2] Remove the screws indicated in the picture. Front hexagon-head screw (key 14). Rear hexagon-head screw (key 12).
- [Image 3] Put the caps included in the SPAAN kit, in place of these screws.  
Put the  $\text{\O}10 \text{\O}20 \times 13$  cap ahead, in the **A** position.  
Put the cap  $\text{\O}20 \times 14 \times \text{\O}8$  behind in the **B** position.
- [Image 4] Place the side plate of the SPAAN sissybar on the caps, securing it with screws included in the SPAAN kit, **M10/125x50** ahead and **M8x30** behind.

#### (2) Sissybar uprights – luggage rack arch

- [Image 5] Fix the sissybar upright (standard or low), or in case of a luggage rack, the luggage rack arch to the sideplates SPAAN with the four screws **M6x20**. Put **M6** nuts from the inside.

**(3) Rack**

For installation in luggage racks kits or in any sissybars of our brand **SPAAN**. We must place it the inside of the small arch or the sissybar uprights and fix the assembly with the 4 screws **M6x20** and nuts **M6** included in the original kit. **In all LUGGAGE RACKS is required to mount the luggage rack arch**, to give more rigidity to the assembly.

Join the set with four screws **M5x10** that accompany the kit. (In the back of the pad is marked with four holes in the fabric the position of the threads).
