

MONDIAL HPS 125 LUGGAGE-RACK MOUNTING INSTRUCTIONS

The luggage rack is anchored in its front part in the screw that fixes the shock absorber in its upper part. At the rear part, on some frame anchors under the seat.

- **Front:** Place the front plates of the luggage rack by the outside of the shock absorbers on the screws that serve as anchorage. Fix it with the original nuts. **(Figure 1).**

- **Rear:** Fix it on the supports that are under the seat. Remove the original screws. Fit the **M6x80** screws included in the **SPAAN** kit from top to bottom **(Figure 2 A)**, inserting the **Ø16x55** bushings between the motorcycle and the support plates of the luggage rack. Fix it with the original nuts **(Figure 2 B).**
