

HYOSUNG AQUILA GV 125 S BOBBER / GRAND VOYAGE Engine Guard mounting instructions

Bottom part: Fix the right side, in the place that can be seen in **image 1**. Previously you have to remove the original screw. Use the **M10/125x160** screw included in the kit, to fix the engine guard.

On the left side, fix with the same previous through screw as can be seen in **image 2**.

Upper part: Fix the engine guard on the right side as shown in **image 3**, hugging the frame tube with the spand included in the kit.

On the left side anchor in the same way. **Image 4**
